

VOLVO SCREED

WEDGE-LOCK[®] SCREEDS

MORE CARE. BUILT IN.

THE TIMELESS QUALITY OF A CLASSIC

The Wedge-Lock® screed series was the first introduced by Blaw-Knox, and today this classic screed is still meeting the performance needs of specialized markets. Simple and inexpensive to run, our Wedge-Lock models are fixed-width, vibratory screeds with one-piece, bolt-on, abrasion-resistant plates. The screed height can be adjusted on the fly for precise control of even the most tender mixes. Wedge-Lock screeds also feature electrical control consoles for convenient switching of the power flow gates, auger conveyor speed range selector, diesel heater controls, and more.

Performance Features

- 2,44 – 3,05 m (**8' – 10'**) standard paving widths
- Hydraulic vibrator drive for frequency control up to 52 Hz (**3100 vpm**)
- Adjustable eccentric weights on vibrator shaft
- Curved pre-strikeoffs
- Spring-loaded MatStop® edger plates with replaceable wear shoes

Options

- Extensions of 152 mm (**6"**), 305 mm (**12"**), 610 mm (**24"**), and 914 mm (**36"**); includes mounting hardware
- Cut-off plates for paving in narrow locations
- Power slope

Product improvement is a continuing goal at Volvo. Designs and specifications are subject to change without notice or obligation.

Volvo Construction Equipment is different. The company's products are designed, built and supported in a different way. That difference comes from our 175-year engineering heritage. A heritage of thinking first about the people who actually use the machines. About how to make them safer, more comfortable, more productive. About the environment we all share. The result of that thinking is a growing range of machines and a global support network dedicated to helping you do more. People around the world are proud to use Volvo. And we're proud of what makes Volvo different – **More care. Built in.**

Not all products are available in all markets. Under our policy of continuous improvement, we reserve the right to change specifications and design without prior notice. The illustrations do not necessarily show the standard version of the machine.
